

## Job description

Painless Medicine and Therapeutics is a community-based chronic pain clinic. We offer multi-modal treatment with an emphasis on ultrasound-guided interventional procedures (nerve blocks) and infusion therapy (such as ketamine).

We are looking for a motivated and interested physician assistant to assist with patient assessments and follow-ups, as well as the above-mentioned procedures. The successful candidate should have a strong predisposition towards working independently while functioning as part of a cohesive team.

We offer the ability to familiarize the candidate with rTMS (repetitive transcranial magnetic stimulation). An exciting new technology that has demonstrated effectiveness in a variety of medical conditions including mood/depression, chronic pain, tinnitus, OCD, etc.

### Position Requirements:

- Computer proficiency with knowledge of EMR
- Work comfortably in a fast-paced environment
- Excellent customer/patient service skills
- Multi-tasking
- Organization
- Attention to detail
- Professionalism and confidentiality
- Excellent verbal and written communication skills
- Excellent work ethic and a positive attitude
- Reliable work attendance
- Follow procedures for all documentation, timelines, and coordination with internal follow-up care teams
- Adhere to standards of best practice

**Position Responsibilities include, but are not limited to:**

- Assist physicians with conducting physical assessments on patients
- Prep patients and assist with procedures
- Patient charting
- Consultation reports

Job Types: Full-time, Part-time

Part-time hours: 35 per week

Salary: \$40.00-\$50.00 per hour

Flexible Language Requirement:

- French not required

Schedule:

- Monday to Friday
- Weekend availability

Ability to commute/relocate:

- Toronto, ON M5J 1R7: reliably commute or plan to relocate before starting work (required)

Experience:

- EMR: 1 year (preferred)
- Physician assistant: 1 year (preferred)

Work Location: In person
